

# Cross Word

## ACROSS

- A violent thunderstorm containing updrafts and downdrafts that allow the storm to maintain itself for several hours
- A low, wedge-shaped cloud that is associated with a thunderstorm gust front
- A cloud type that is dense and develops vertically
- Negatively-charged particles
- A thunderstorm that divides into two storms
- Precipitation in the form of ice
- This happens when negative charges in the cloud are attracted to positive charges in the ground
- Positively-charged particles

## DOWN

- Location of the center of the storm
- This kind of discharge is a sudden flow of current
- This front forms a boundary between cold air from the thunderstorm downdraft and warm, humid surface air
- A line of active thunderstorms
- A line of cumulus clouds connected to and extending outward from the most active part of a thunderstorm
- A boundary separating thunderstorm-cooled air from the surrounding air
- This is caused by a sudden expansion of the air in the path of the electrical discharge
